

I would like to voice my concern that expansion of Low Power FM service could affect the FM translator signal of K-LOVE radio station. I have been a financial supporter of K-LOVE for several years and have found the positive impact on my family and our community to be tremendous.

The family values and wholesome message in thier programming is something that is hard to find in our country today. I know that there is more to consider than just one station, but if LPFM is given priority over FM translators and this causes K-LOVE stations to be knocked off the air I believe this will deliver a serious blow to the ministry currently doing great good through K-LOVE.

Thank you for your time.

Sincerely,

Gary N Stevens
